Subject: Situation Report

Greetings Field Friends (no MH, JC, SM on here), There was talk this evening about getting a SitRep out to try to share some information with someone :)

Sarah Hulstein (SitUnit in the EOC with me, she's new, say hello) and I made an attempt at a draft...new info is highlighted yellow and there a couple of spots we need to check BUT if you'd like, you can take a look and provide changes back to us for subsequent routing here. OR if you all are ready to handle this from Durango, that is cool, just let us know.

Thanks much, G

Subject: Cement creek

To let everyone know our water is running clear but there are episodes of orange water when the county is working on culverts or dirt sluffs off the steep side walls of their work area even when they are not working
